MATERIALS HANDLING MADE SIMPLE

**EVERYTHING YOU NEED
– AND NOTHING YOU DON'T**

You can depend on these versatile forklifts to get the job done. Without fuss, frills or unnecessary features.

Designed for light or medium duty applications, both outdoor and indoor, they're reliable, robust and economical to operate. Just as you would expect from any Cat lift truck. But what will surprise you is their low purchase price...

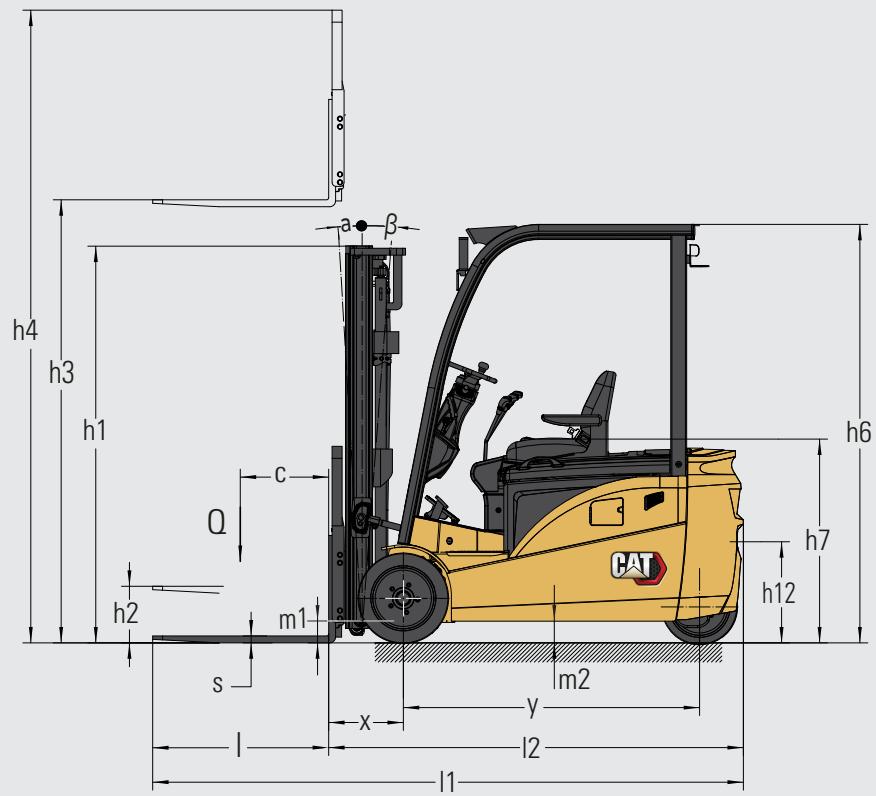

Characteristics									
1.1	Manufacturer								
1.2	Manufacturer's model designation								
1.3	Drive: (battery, diesel, LPG, petrol)								
1.4	Operator type								
1.5	Load capacity	Q (kg)							
1.6	Load centre distance	c (mm)							
1.8	Load distance, axle to fork face	x (mm)							
1.9	Wheelbase	y (mm)							
Weight									
2.1	Truck weight, without load / including battery (simplex mast, lowest lift height)	kg							
2.2	Axle loading with maximum load, front / rear (simplex mast, lowest lift height)	kg							
2.3	Axle loading without load, front / rear (simplex mast, lowest lift height)	kg							
Wheels, Drive Train									
3.1	Tyres: V = solid, L = pneumatic, SE = solid pneumatic - front / rear								
3.2	Tyre dimensions, front								
3.3	Tyre dimensions, rear								
3.5	Number of wheels, front / rear (x = driven)								
3.6	Track width (centre of tyres), front	b10 (mm)							
3.7	Track width (centre of tyres), rear	b11 (mm)							
Dimensions									
4.1	Mast tilt, forwards / backwards	δ / β °							
4.2	Height with mast lowered	h1 (mm)							
4.3	Free lift	h2 (mm)							
4.4	Lift height	h3 (mm)							
4.5	Overall height with mast raised	h4 (mm)							
4.7	Height to top of overhead guard	h6 (mm)							
4.8	Seat height	h7 (mm)							
4.12	Tow coupling height	h10 (mm)							
4.19	Overall length	l1 (mm)							
4.20	Length to fork face (includes fork thickness)	l2 (mm)							
4.21	Overall width	b1 / b2 (mm)							
4.22	Fork dimensions (thickness, width, length)	s / e / l (mm)							
4.23	Fork carriage iso 2328/30, FEM/A,B								
4.24	Fork carriage width	b3 (mm)							
4.31	Ground clearance under mast, with load	m1 (mm)							
4.32	Ground clearance at centre of wheelbase, with load (forks lowered)	m2 (mm)							
4.33	Working aisle width with 1000 x 1200 mm pallets, crosswise	Ast (mm)							
4.34a	Working aisle width with 800 x 1200 mm pallets, crosswise	Ast (mm)							
4.34b	Working aisle width with 800 x 1200 mm pallets, lengthwise	Ast (mm)							
4.35	Turning circle radius	Wa (mm)							
4.36	Minimum distance between centres of rotation	b13 (mm)							
Performance									
5.1	Travel speed, with / without load	km / h							
5.2	Lifting speed, with / without load	m / s							
5.3	Lowering speed, with / without load	m / s							
5.5	Rated drawbar pull, with / without load	N							
5.6	Maximum drawbar pull, with / without load (5 min short duty)	N							
5.7	Gradeability, with / without load	%							
5.8	Maximum gradeability with / without load	%							
5.9	Acceleration time (10 metres) with / without load	s							
5.10	Service brakes (mechanical / hydraulic / electric / pneumatic)								
Electric motor									
6.1	Drive motor capacity (60 min. short duty)	kW							
6.2	Lift motor output at 15% duty factor	kW							
6.3	Battery to DIN 43 531 / 35 / 36 A / B / C / no								
6.4	Battery voltage	V / Ah							
6.5	Battery weight (including container)	kg							
6.6a	Energy consumption according to DIN EN 16796	kWh / h							
6.6b	Energy consumption acc. to VDI cycle (3)	kWh / h							
Miscellaneous									
8.1	Type of drive control								
10.1	Maximum operating pressure for attachments	bar							
10.2	Oil flow for attachments	l / min							
10.7	Noise level, value at operator's ear (EN 12053)	dB (A)							
10.8	Towing coupling, type DIN 15170								

1) Depending on the type of mast

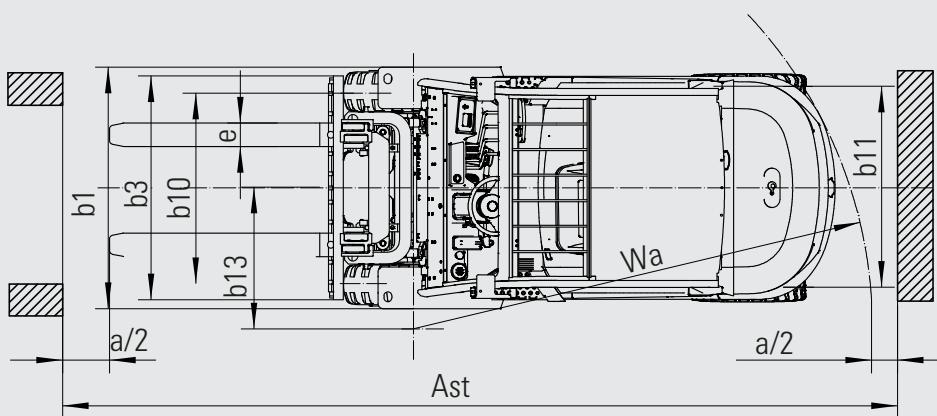

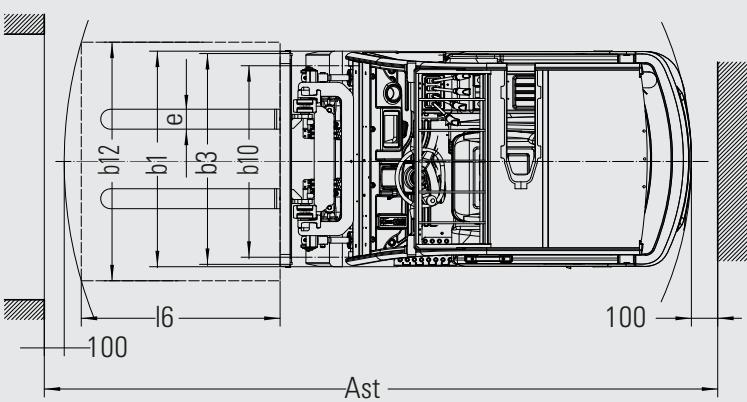

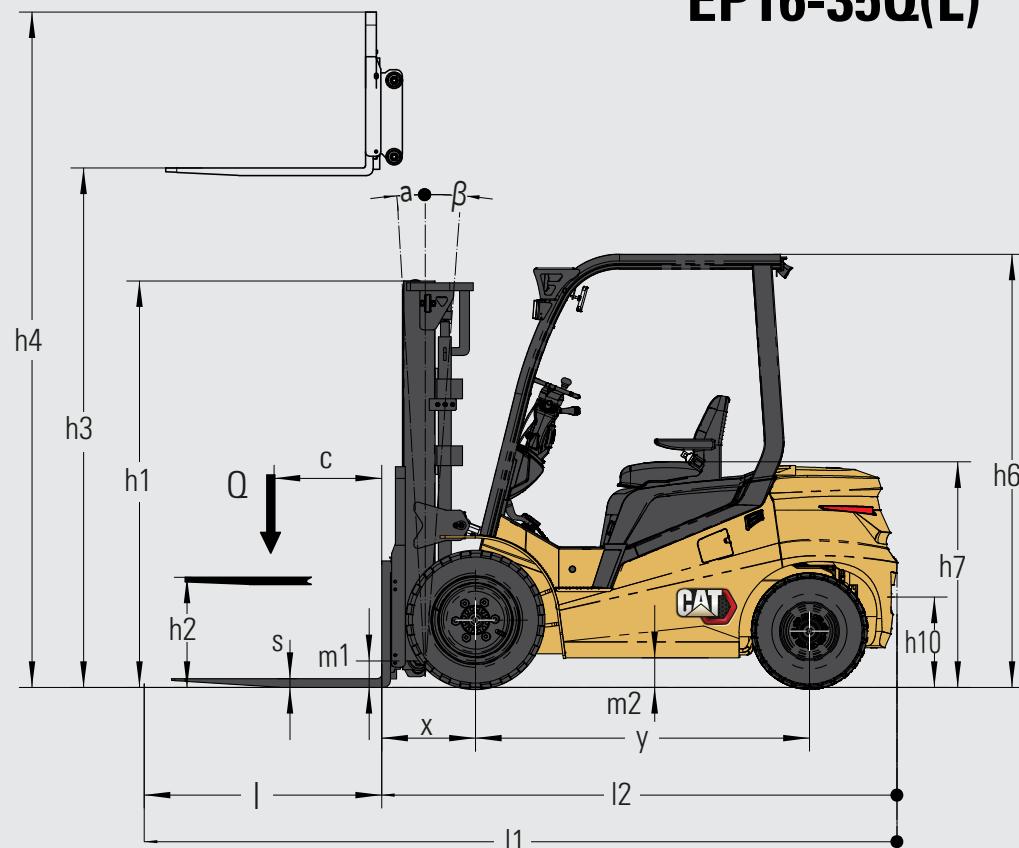

2) Custom design fork carriage

3) Cycles performed / cycles requested

ENTRY-LEVEL PRODUCTS WITH CAT LIFT TRUCKS QUALITY

Does your application really need a high-spec lift truck? If not, don't overspecify. Our EQ line offers just the right specification – with quality assured. Here's the choice:

- **Our famous high-spec products.** For critical tasks demanding 100% in terms of performance, productivity and efficiency. Jobs where anything less can seriously affect your business.
- **Our EQ line entry-level products.** For everyday jobs that simply require a dependable forklift. Less intensive applications with occasional or light use.

Our EQ line forklifts have everything you need to do the job, in a simple, straightforward package. Like all Cat products, their qualities include sturdy construction, easy maintenance, energy efficiency, robust performance, user-friendly design, and safety.

What's more, they're marked with the Cat Lift Trucks brand. This symbol of quality, dependability and performance gives total confidence. And, of course, they're backed by great service and support from our dealer network.

EQ line counterbalance trucks are equally at home in warehouse aisles or weather-beaten yards. This flexibility reduces your fleet needs and investment. Choose from three or four wheels, 48 or 80V battery power, and capacities from 1.6 to 3.5 tonnes. Whatever best fits your application – without overspecifying.

These forklifts are user-friendly without being unnecessarily luxurious. All controls are exactly where your drivers expect them to be. From the mechanical hydraulic levers to the auto-style pedals, they function intuitively. A comfortable seat and low vibration levels help further in creating the right conditions for productivity.

Our safety features minimise accident risks and safeguard your drivers, pedestrian staff, facilities, trucks and goods. We focus especially on comprehensive lighting kits, hazard warning features and clear vision.

Lithium-ion (Li-ion) batteries, fitted as standard, make the trucks even more cost-effective and productive. Key benefits include high energy efficiency, long lifespan, zero maintenance needs, fast charging and constant truck availability.

LOWER COST OF OWNERSHIP

- Li-ion batteries give maximum lifespan, energy efficiency and runtime, with no need for battery swaps, water top-ups or other maintenance.
- Easy servicing saves on time and cost.
- Robust construction ensures reliable operation with minimal servicing and repair needs.
- Effective sealing protects key components against water-related damage.
- Front and rear super elastic tyres offer a long service life, while protecting other components against vibration-related wear thanks to their excellent shock absorption.
- Non-marking super elastic tyre option reduces the need for floor cleaning.
- Cabin-ready overhead guard allows quick, easy and low-cost cabin installation.
- Cold store modification option (down to -18°C) prevents damage and maintains efficiency in extremely low temperatures.

UNMATCHED PRODUCTIVITY

- Li-ion technology saves time with fast onboard charging, including opportunity charging, so battery exchanges are unnecessary and the truck is always ready to work.
- Super elastic tyres enable reliable truck performance on uneven floors.
- Integrated and external charger options add flexibility: integrated for convenience and space saving, with simple plug-in to any suitable electrical socket; external for faster charging and high-demand use.
- Choice of simplex and triplex masts available: simplex offering a cost-effective, single-stage lifting approach for basic applications; triplex enabling greater lift heights, along with versatility for both low-clearance and high-rack operations.
- Standard hook-on side shift simplifies and speeds up pallet handling and placement.
- Optional fork positioner including side shift adds further adaptability and efficiency in handling varied loads.
- Increased travel and lift speed option boosts materials handling productivity.

SAFETY AND ERGONOMICS

- Familiar and intuitive controls, including conventional hydraulic levers, allow easy operation from day one with less need for training.
- Optional fingertip levers for hydraulics and forward/reverse selection provide precise control with minimal effort or strain.
- Seat suspension reduces vibration and ensures driver comfort.
- Luxury seat option maximises ergonomics, comfort and posture support, to minimise fatigue and optimise driver concentration and performance.
- Spacious operator compartment provides freedom of movement.
- Super elastic tyres further reduce vibration levels for operators.
- Glass roof option (or PVC on three-wheel models) keeps driver dry and comfortable, protects against both large and small falling objects, and maximises upward view.
- Optional front window with wiper maintains clear view in rainy or dusty conditions.
- Complete weatherproof cabin option can be fitted easily for work in wet or cold environments.
- Road light kit, including front and rear work lights, direction indicators and hazard lights, provides 'see-and-be-seen' safety, both on site and on roads.
- Rear blue spot is projected onto floor to warn pedestrians of reversing truck's approach.
- Strobe light maximises visibility to pedestrians and other truck operators, even in outdoor and low-light conditions.
- Reverse warning buzzer alerts surrounding workers to potentially hazardous situations.
- Parabolic rear-view mirror enhances all-round vision and reduces blind spots, for safer manoeuvring.
- Li-ion battery chemistry means no risk of hazardous gas or acid leaks.

EQ LINE LI-ION BATTERIES

Our EQ line trucks come equipped with lithium-ion (Li-ion) battery technology.

A great advantage of Li-ion is that it allows the use of opportunity charging. Instead of exchanging batteries between shifts, you can simply plug into a fast charger during short breaks. Your business will also enjoy the other efficiency, environmental and safety benefits outlined here.

LONGER LIFE

– 3 to 4 times lead-acid lifespan – reduces overall battery investment

FASTER CHARGING

– enables full charge in as little as 1 hour with the fastest chargers

HIGHER EFFICIENCY

– energy losses during charging and discharging are up to 30% lower, so electricity consumption is reduced

NO BATTERY CHANGING

– fast opportunity charging – 15 minutes for several hours of extra runtime – makes operation convenient with just one battery and minimises the need to buy, store and maintain spares

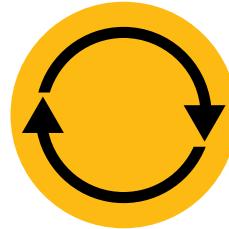

LONGER RUNTIME

– thanks to more efficient battery performance and use of opportunity charges, which can be given at any time without damaging the battery or shortening its lifespan

NO DAILY MAINTENANCE

– the battery stays on board the truck for charging and there is no need for water top-ups or electrolyte checks

CONSISTENTLY HIGH PERFORMANCE

– with a more constant voltage curve – maintains truck performance even as battery charge gets low

INBUILT PROTECTION

– intelligent battery management system (BMS) automatically prevents excessive discharge, charge, voltage and temperature, as well as virtually eliminating misuse
